Low-Income Housing Tax Credit Program

ADFA is the state agency charged with administering the federal low-income housing tax credits program. Generally speaking, there are two types of these credits against federal income-tax liability, which are awarded differently.

First, the State of Arkansas annually receives a specified amount of credits commonly known as “9% credits.” Because demand for 9% credits regularly exceeds the annual supply, ADFA allocates these credits in a competitive process, which is open to applications for projects in all counties of the state. In the 2019-2020 fiscal year, ADFA received applications for 22 projects in ten counties and allocated about \$10.7 million in annual 9% credits to help finance 11 projects in seven counties, containing a total of 784 residential units. Please see below for more information on the individual projects that received allocations.

Second, credits commonly called “4% credits” may arise in connection with the issuance of tax-exempt private-activity municipal bonds to finance the costs of affordable multifamily housing. In the 2019-2020 fiscal year, ADFA issued multifamily housing bonds on three occasions (ADFA is not aware of the issuance of similar bonds during the fiscal year by any other Arkansas issuer). The ADFA bonds were issued in the total principal amount of \$52.9 million to help finance the costs of providing 774 residential units in three projects. It is expected that these financings will generate 4% credits in a total annual amount of about \$3.9 million. All three projects are located in Pulaski County, but ADFA welcomes applications for projects in all counties of the state. There is no direct annual limit on the award of 4% credits, although they arise only in connection with the issuance of bonds that use part of the state’s annual private-activity bond volume cap allocation.
